**ROCKBRIDGE FURTHER EXPANDS REE AND COPPER PROPERTY AND ADVANCES  
WORK PROGRAM**

VANCOUVER, BC - RockBridge Resource Inc. (RockBridge- TSXV symbol- "RBE") announces as part of its 2010 work program on its Cross Hills property, the commencement of the summer prospecting program, and the expansion of the Cross Hills property. The Cross Hills property now consists of 100% interest in 343 mineral claims covering 20,923 acres, prospective for Rare Earth Elements and metals and for Copper.

RockBridge Resources Senior Vice President, Adrian Van de Mosselaer, along with RockBridge's geologists and prospectors inspected the Cross Hills property late last week to kick off a 10 day focussed prospecting program. The results from this program will establish targets for drilling later this summer.

RockBridge met with the Mayor and council of Grand Le Pierre, the town situated within the Cross Hills property, and received tremendous support. New information and potential new claims were identified which has lead RockBridge to expand its Cross Hills property. Three new claim areas have been registered. One area consists of 10 claims covering 610 acres near Little Harbour East, across the harbour from Cross Hills, encompassing a coastal area known to locals as "Blue Rocks". The second area of 11 new claims expands RockBridge's Cross Hills property 671 acres to the south to fully encompass the coastal portion of the property, and an area know to locals as "The Mine", which was prospected for Gold many years ago. The third consists of 18 claims of 1,098 acres extending RockBridge's property in the north east to encompass a visible large quartz vein.

Photos of the new claim areas, and prospecting activity are available on RockBridge's web site at <http://www.rockbridgeresources.com/projects.cfm>

RockBridge President, Gary Mathiesen commented, "RockBridge would like to thank the people of Grand Le Pierre for their generous assistance and support. It is because of the support of the community leaders that RockBridge has been able to identify some very interesting targets for prospecting. We look forward to the completion of the summer prospecting program, the commencement of drilling later this summer, and increased involvement in the community."

## **About RockBridge**

RockBridge has a diversified and broad resource base. It includes 343 Newfoundland mineral claims prospective for Rare Earth Elements and Copper with its 2010 work program underway, 6 B.C. mineral claims and 9 Yukon mineral claims prospective for Gold, as well as varying interests in 19 Oil and Gas wells and properties in Alberta and B.C. including the Pembina Cardium properties slated for horizontal well development later this year and the expanding Woodrush project.
